

Technical Data Sheet

ReadyTube™ 10 Fraser Listeria Selective Enrichment Broth acc. ISO 11290

Ordering number: 1.46208.0020 / 1.46208.0100

For the primary and secondary selective enrichment of *Listeria* spp. from food and animal feed as well as from environmental samples and other materials.

This culture medium complies with the specifications given by EN ISO 11290 and APHA.

Mode of Action

The high nutrient content and the large buffer capacity creates optimum growth conditions for *Listeria*. The growth of accompanying bacteria is largely inhibited by lithium chloride, nalidixic acid and acriflavine hydrochloride. The detection of the β -D-glucosidase activity is possible by the addition of aesculin and ammonium iron(III) citrate forming a black complex of aesculin iron(III) ions. But this reaction is not exclusive to *Listeria* spp., so that following EN ISO 11290-1, every primary and secondary enrichment in Fraser broth has to be sub-cultured on selective plating media.

Application and Interpretation

Depend on the purpose for which the medium is used. Incubate for the primary enrichment step the inoculated Half Fraser broth under aerobic conditions, e.g. acc. to EN ISO 11290-1 at 29-31 °C for 22-26 h.

Transfer 0.1 ml material from the resulting culture (regardless of its color) to the secondary enrichment culture medium, e.g. 10 ml Fraser broth, following the method given EN ISO 11290-1.

Incubate for the secondary enrichment step the inoculated Fraser broth under aerobic conditions, e.g. acc. to EN ISO 11290-1 at 36-38 °C for 46-50 h.

From the culture obtained in the primary and the secondary enrichment culture selective solid media are inoculated, see details given by EN ISO 11290-1.

Storage and Shelf Life

The product can be used for sampling until the expiry date if stored upright, protected from light and properly sealed at +4 °C to +12 °C.

The testing procedures as described on the CoA can be started up to the expiry date printed on the label.

Disposal

Please mind the respective regulations for the disposal of used culture medium (e.g. autoclave for 20 min at 121 °C, disinfect, incinerate etc.).
